

Adjustments for a 1-for-5 Reverse Split

In a 1-for-5 reverse stock split, each 100 shares previously purchased is now 20 shares. This split will require some changes to how you continue the Snider Investment Method® in this position.

You will need to make adjustments to your Snider Method recordkeeping. **Make these changes before next Trade Day.** *You will need to adjust your Individual Stock Purchase Record and Band Rule Worksheet.* The rest of this document will explain those adjustments in detail.

You will begin the process by making adjustments to your Individual Stock Purchase Record and Band Rule worksheet.

STEP 1 – CALCULATE YOUR NEW PRICE PAID AMOUNTS

Because each purchase now represents fewer shares, your Price Paid amounts will increase. Enter your original purchase price for each lot that remain of the reverse split stock in the Old Price Paid column and multiply by 5 to calculate your new Price Paid.

OLD PRICE PAID		SPLIT AMOUNT		NEW PRICE PAID
	X	5	=	
	X	5	=	
	X	5	=	
	X	5	=	
	X	5	=	
	X	5	=	
	X	5	=	
	X	5	=	
	X	5	=	
	X	5	=	

STEP 2 – CALCULATE YOUR NEW TOTAL SHARES

The number of shares you own will also change. To determine how many new Total Shares you have, divide your old Total Shares by 5. This information can also be found in your account.

OLD TOTAL SHARES AMOUNT		SPLIT AMOUNT		NEW TOTAL SHARES AMOUNT
	÷	5	=	

Make sure to transfer both the new Price Paid and Total Shares amounts to your Individual Stock Purchase Record.

STEP 3 – CREATE A NEW BAND RULE WORKSHEET

Create a new Band Rule Worksheet with your adjusted purchase prices. Use the new Price Paid amounts to determine the new Upper and Lower Limits of your Bands. Then record your purchases in the appropriate Band.

You have now completed all the necessary adjustments to your Snider Method worksheets. The following are changes to how you will trade your reverse split position.

STEP 4 – DETERMINE YOUR NEW MONTHLY PURCHASE LEVEL

Buying shares in lots of 100 per month before a 1-for-5 split may cause problems for your New Monthly Purchase Level. After the split, your new Level is 20.

The table below will help you determine your new Monthly Purchase Level. Your new Level is based on both the terms of the split and your original purchase Level.

ORIGINAL LEVEL	NEW LEVEL
100	20
200	40
300	60
400	80
500	100

From now on, you will purchase shares at your new Level. Do not buy shares at your original Level.

You may already be close to or at 10 times your purchase Level. If you have already made ten purchases, you cannot purchase any additional shares. Doing so will cause you to use more cash than originally allocated to the position.

You can now buy shares and sell options like normal. However, keep in mind that if your new purchase level is 20, your previous purchases represent 20 shares and one option covers 100 shares.

You have now completed all the necessary adjustments to your Snider Method worksheets.

We know that a stock split may cause you some frustration and concern. We are always here to answer your questions and guide you through the process.

THE FINE PRINT
